

Undergraduate Academic Transcript

Name: Ding Hanfei Gender: female Student ID: 2021108303
College: College of Computer Science and Technology College of National Secrecy College of Software Class: 20210611 Major: Computer Science and Technology

Modules	Catego	Credit(s)	Mark	Modules	Catego	Credit(s)	Mark
2021-2022-1nd semester				The History of World Sea War	Public optional	1.5	Excellent
Computational thinking (i)	Core	1.0	Excellent	Introduction to the Basic Principles of Marxism	Core	3.0	90
College English (1)	Core	2.0	88	Special Lecture on the History of the CPC	Public optional	1.0	Excellent
Engineering Ethics and Engineering Cognition	Core	1.0	Good	Complex Variables	Core	2.0	95
Military Training	Core	2.0	Good	College Physics II	Core	4.0	79
Moral Cultivation and Legal Basis	Core	3.0	90	University Physics Experiment (II)	Core	1.0	Excellent
Engineering Mathematical Analysis (1)	Core	4.5	98	2022-2023-2nd semester			
Linear Algebra and Analytic Geometry A	Core	3.5	97	Principle of computer composition	Core	3.5	96
Psychological Health Education for College Students	Public optional	1.5	Excellent	Computer network	Core	3.0	87
2021-2022-2nd semester				ACM programming	Specialised optional	1.0	Excellent
Computational thinking (ii)	Core	2.0	Excellent	"Fundamentals of software engineering"	Specialised optional	2.5	95
3D printing-from dream to reality	Public optional	1.5	Good	Fundamentals of Mechanical Design	Core	2.0	97
Engineering drawing	Core	2.0	97	Project Management and Engineering Economic Decision Making	Core	0.5	Good
College English (2)	Core	2.0	91	College English (4)	Core	1.5	92
Interpretation of English Vocabulary	Public optional	1.5	Excellent	Physical Education II	Core	1.0	Good
Physical Education I	Core	1.0	Excellent	Introduction to Mao Zedong Thought and Theory System of Socialism with Chinese Characteristics	Core	3.0	80
Military Theory	Core	2.0	Good	Fundamentals of Innovation and Entrepreneurship	Public optional	1.0	Excellent
Outline of China's Modern History	Core	3.0	87	How to Win the Innovation and Entrepreneurship Competition for College Student	Public optional	1.0	Good
Engineering Mathematical Analysis (2)	Core	5.5	94	2023-2024-1nd semester			
Probability Theory and Mathematical Statistics	Core	3.0	100	Introduction to computer science	Core	1.0	90
College Physics I	Core	4.0	95	The operating system	Core	4.0	91
University Physics Experiment (I)	Core	1.0	Good	Computer hardware integrated course design	Core	1.0	Good
2022-2023-1nd semester				Algorithm design and analysis	Core	2.5	93
Theoretical Mechanics B	Core	2.5	84	Information management system practice	Core	1.0	Excellent
The data structure	Core	4.5	95	"Database principle"	Specialised optional	2.5	89
Discrete mathematics	Core	4.0	92	Spoken English	Public optional	1.0	Excellent
Object-oriented programming	Specialised optional	1.5	Good	Engineering Practice	Core	4.0	Excellent
Fundamentals of Electric Circuits	Core	4.0	86	Situation and Policy	Core	2.0	Excellent
Environmental Protection and Sustainable Development	Core	2.0	84				
College English (3)	Core	1.5	93				

Notes: 1. Conversion between centesimal system and five-grade marking system: 90≤ Excellent≤100/ 80≤Good<90/ 70≤Fair<80/ 60≤Pass<70/ Fail<60.

2. A mark with the sign ▲ is referral mark, and a mark with the sign ▼ is repeat mark.

A mark with the sign ◆ refers to autonomous examination mark.

A mark with the sign ● is absence/violation and cheat mark.

Harbin Engineering University

May 28, 2026

专用章

Name: Ding Hanfei Gender: female Student ID: 2021108303
College: College of Computer Science and Technology College of National Secrecy College of Software Class: 20210611 Major: Computer Science and Technology

Modules	Catego	Credit(s)	Mark
Introduction to Xi Jinping Thought of Socialism with Chinese	Core	3.0	85
2023-2024-2nd semester			
Compilation principle	Core	3.0	85
Computer system architecture	Core	2.5	93
Microcomputer system and interface	Core	3.0	88
Compilation system design	Core	2.0	Excellent
CSP program design	Specialised optional	1.0	Fair
Physical Education III	Core	1.0	Excellent
The Introductory Course The Art of War by Sunzi	Public optional	2.0	Excellent
2024-2025-1nd semester			
Graduation practice	Core	2.0	Good
Embedded system design	Core	2.0	Fair
Artificial intelligence (ai)	Specialised optional	1.5	Excellent
Distributed and parallel computing	Specialised optional	1.5	Good
Software security	Specialised optional	1.5	Good
"A Brief History of Western Music and Appreciation of Classics"	Public optional	1.5	Excellent
2024-2025-2nd semester			
Graduation project (thesis)	Core	14.0	Excellent
Blockchain technology	Specialised optional	1.5	Pass
Confidentiality history and confidentiality policy	Specialised optional	1.5	Fair
-----Total-----			
Total credits: 163.0 Credits of public optional courses: 13.5			
Credits of core modules: 133.5 Credits of specialised optional modules: 16.0			

Notes: 1. Conversion between centesimal system and five-grade marking system: 90≤ Excellent≤100/ 80≤Good<90/ 70≤Fair<80/ 60≤Pass<70/ Fail<60.

2. A mark with the sign ▲ is referral mark, and a mark with the sign ▼ is repeat mark.

A mark with the sign ◆ refers to autonomous examination mark.

A mark with the sign ● is absence/violation and cheat mark.
